

DO THI THU HANG
SOFTWARE ENGINEER

thuhang-dev.vercel.app | github.com/Thuhang2604 | linkedin.com/in/thuhangdo2604

Backend-focused full-stack developer with hands-on experience building web applications using Spring Boot, Node.js, ReactJS, and SQL databases.

Experienced in developing RESTful APIs, authentication and authorization systems, payment integrations, and database-driven applications through internship and personal projects.

Interested in scalable backend systems and secure software development.

WORK EXPERIENCE

FPT Software | Software Engineering Intern

Jan 2024 – Apr 2024 | Ho Chi Minh City, Vietnam

- Developed frontend components and backend business logic for internship management modules using ReactJS and Spring Boot in an Agile/Scrum team.
- Participated in 2-week sprint cycles, collaborating through GitLab, Jira, code reviews, and CI/CD processes to support continuous integration and iterative feature delivery.
- Performed frontend testing using Jest, contributing to improved UI reliability and maintainability.
- Tech Stack: Java, Spring Boot, ReactJS, GitLab

ACADEMIC PROJECTS (2024 – 2025)

3D Furniture E-Commerce Platform with Real-Time Inventory & Chat System

ReactJS, Vite, TypeScript, TailwindCSS, Socket.io

- Built a 3D furniture e-commerce platform with 10+ responsive pages for shopping and warehouse operations.
- Developed dashboards, inventory transfer, and order/payment management features using ReactJS and TypeScript.
- Integrated real-time customer/staff chat with Socket.io and supported interactive 3D product visualization.

Second-Hand EV & Battery Trading Platform with Real-Time Chat & PayPal Integration

Node.js, ExpressJS, MySQL, Sequelize, JWT

- Built backend services for a second-hand EV trading platform with product listings and online payments.
- Developed 40+ RESTful APIs for authentication, products, chat, notifications, reviews, and payments.
- Implemented JWT authentication, Google Login, real-time chat, notifications, and PayPal integration.

Online Quiz Management Platform with RESTful API & Result Tracking System

ReactJS, Redux Toolkit, Node.js, MongoDB

- Built an online quiz platform supporting quiz creation, submissions, and result tracking.
- Developed 15+ RESTful APIs for quiz, question, and user management using Node.js and MongoDB.
- Applied Redux Toolkit for state management and deployed the system with Vercel and MongoDB Atlas.

SKILLS

Frontend
ReactJS, Redux Toolkit, TailwindCSS, HTML5, CSS3

Backend
Spring Boot, Node.js, ExpressJS, RESTful APIs, JWT Authentication

Tools
Git, GitLab, Docker, Postman, Vercel, Jira, Trello

Databases
MySQL, PostgreSQL, MongoDB

EDUCATION
FPT University 2021 – 2026
Bachelor of Software Engineering

LANGUAGES
English Intermediate Professional Working Proficiency
French Basic

EXTRACURRICULAR ACTIVITIES

Traditional Instrument Club – FPT University (FTI)

Supported event organization, member coordination, and exhibition activities for university cultural events.
